

Greetings!

Marino\WARE invites you to schedule a Lunch & Learn educational event about the exciting and evolving steel framing industry. We can provide a professional development hour targeted specifically to your group and/or AIA CEUs relating to Cold-Formed Metal Framing products and accessories. View the event highlights below and book today!

Professional Development Hours:

- **A New Generation of Framing**- engineered studs provide superior strength and trade-friendly features enhancing quality, speed, safety and coordination with other trades.
- **Fire and Sound**- superior products to ensure performance and lessen installation risks.
- **Beyond Studs**- steel framing accessories including lath and plastering products, sleek finishes with beads and trims, channel accessories, clips and tricks.

AIA Accredited CEU options, each worth 1 LU/HSW:

- **Interior Non-Load Bearing Partitions (MW002)**- basic interior partition framing, stud, track & channel identification and uses, design guidelines, code compliance, LEED credits, and more.
- **Architect Guide to Cold-Formed Steel Floor Systems (MW001)**- LEED & the recyclability of cold-formed steel (CFS), uses & methods for CFS floor systems, alternative floor framing products, basic design guidelines, resources, and more.
- **Dynamic and Static Head-of-Wall Joint Fire Protection (MW003)**- describe head of wall joint/ assembly, UL listed assembly, four standards used to determine UL 2079 approval, detection capacity, L-ratings, shaft wall assemblies, advantages/disadvantages of different joint treatment types and considerations for design professionals.
- **An Architects Guide to Sound Isolation (MW005)**-
 - What is Noise
 - What are STC Ratings
 - Inform and identify Products for Sound isolation
 - Provide basic design guidelines for what needs to appear on your construction documents.
 - Provide resources you can use to help your design effort for Sound Isolation
 - Answer your questions

About Marino\WARE:

For over 70 years Marino\WARE® has been producing the highest quality steel products. Our metal framing product line includes: ViperStud® drywall framing, structural stud and track, FrameRite® clips and connectors, JoistRite/StudRite, shaftwall products, plastering steel, and drywall finishing products all under one roof. We carry a huge inventory of finished goods so that you can get anything you need without waiting, including custom orders for quick shipment. Our own in-house carrier, Norbet Trucking, ensures that delivery service is never compromised. We also offer in-house technical support and shop drawings through Marino\WARE Design Group. With structural engineers experienced in a wide array of cold-formed steel projects; from multi-story load-bearing commercial structures to single family residences, our team of engineers provides full service engineering and technical consultation to contractors, architects and structural engineers throughout the country.
